Dear Thirty Madison,

I am interested in applying for the Software Engineer - Backend position, which was listed through Built In.

I have about 3 years of experience with DevOps however I am trying to gravitate towards a software engineering position. Being a DevOps engineer I was able to learn a multitude of skills. This includes Python Programming, AWS and collaborating with many different teams. This has strengthened my communication skills as well as my technical ones. Most of all, I really enjoy learning and with my technical background I think that I would be an asset to your company. This job would provide me with the ideal opportunity to assist your organization and to expand my skills as a Backend Software Engineer.

I hope to schedule an interview, at a mutually convenient time. I look forward to speaking with you.

Thank you for your consideration.

Sincerely,

Camille Owens
